

NAND/AND MODULES: MODIFICATION ACT ON TAMTAMS

*See folder *TAMTAMS_FILE_MODIFIED*: all the modified and added files are reported here ordered in same directory structure as *TAMTAMS_FILES*.

Here are reported directory by directory the modification made:

1. ./Documentation/ModulesHTML/nand_and:

Files *Delay_Pow_[...][...].html* are added.

2. ./Documentation/ModulesPDF/nand_and:

Files *CMOS-logic gates characterisation* and *Dynamic-logic gates characterisation* are added.

3. ./Modules/nand_and:

Files *Delay_Pow_[...][...].m* are added.

Files *I_Pow_[...][...].m* are modified to include new variable. (replace this new one)

4. ./plots:

The file *plot_nand_and.m* is modified to include new variable. (replace this new one)

5. ./prints:

the file *prints_nand_and.m* is modified to include new variable. (replace this new one)

6. ./Documentation.php

The file *Documentation.php* is modified as follow:

the lines reported in the file *lines_to_add_in_documentation* are added starting from the line code 411 as follow:

```
.....  
href="Documentation/ModulesPDF/nand_and/I_Pow_Pass_Transistor_AND4.pdf" target="_blank"> View  
PDF</a></u></i></li>
```

```
</ul>
```

```
</li>
```

```
.....[add here lines to add in documentation]
```

```
</font>
```

```
</ul>
```

```
</li>
```

```
<li> <b>PDE</b> - Poly Depletion Effect on threshold voltage
```

```
<ul>
```

```
.....
```

7. ./modules_help

Files *Delay_Pow_[...][...].m.help.html* are added.

The folder *latexs* contains the source codes for the documentation pdfs.
